DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this section can be found in the prior office action.
2. The prior office actions are incorporated herein by reference. In particular, the observations with respect to claim language, and response to previously presented arguments.
3. Examiner withdraws rejection of claims 1-37 under 35 U.S.C 112-first paragraphs due to correction by the applicant.
4. Claims 1, 17 and 28 have been amended.
5. Claims 1-37 are pending.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
- As per applicant's arguments that "it is clear from the profile table illustrated in fig.4 that no reference to any user authorization appears therein" (page 12, last paragraph of the response) is not persuasive because applicant fails to describe how is it clear? And where is the support in the specification with respect to the time the invention was filed?

Examiner strongly suggests that Applicant recite positive language and not negative, since the negative limitation has not been shown to have support in the disclosure as originally filed.

- As per applicant's arguments with respect to "profile table" and "user table" (that is having two tables) page 12, first paragraph of the response, Examiner refers Applicant to the following remarks:

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "profile table" and "user table" (that is having two tables)), are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 112

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claims 1-37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject

matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. I.e., "Containing no reference" to any user authorization in independent, claims 1, 17 and 28.

Claim Rejections - 35 USC § 102

9. **Claims 1-37** are rejected under 35 U.S.C. 102(e) as being anticipated by Ahlberg et al (6,587,836 B1).

Also see entire Ahlberg et al's patent 6,587,836.

As per claims 2 and 29 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claims 1 and 28, wherein all of said editing steps are performed under supervision of an administrator to the exclusion of users (see col.16, lines 21-32).

As per claims 3, 20 and 30 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claims 1, 17 and 28, including the further step of authorizing access of each user to selected resources included in said resource list in accordance with contents of profiles in said list of profiles which are associated with each user in said list of users (see col.13, lines 53-67 and col.14, lines 1-20).

As per claims 4, 10, 19 and 31 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claims 3, 9, 18 and 30, wherein said authorizing step is performed upon detection of a said editing step (see col.15, lines 18-24).

As per claims 5, 11 and 32 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claims 4, 10 and 31, wherein said detection is performed by comparison of said lists of users, profiles and resources

Art Unit: 2132

with prior lists of users, profiles and resources (see col.15, lines 18-32 by refreshing the new information is listed in comparison with the previous list).

As per claims 6-8, 12-14, 21-23, 33 and 35 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claims 1, 9-11, 17 and 28 including the further steps of authenticating a user in accordance with said userID, and providing access to a resource, authorized by said authorizing step, which is selected by said user authenticated in said authenticating step (see col.13, line 67 and col.14, lines 1-21).

As per claim 9 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claim 2, including the further step of authorizing access of each user to selected resources included in said resource list in accordance with contents of profiles in said list of profiles which are associated with each user in said list of users (see col.13, lines 53-67 and col.14, lines 1-20).

As per claims 15, 26 and 36 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claims 1, 17 and 28, including the further step of deleting a resource from all profiles specifying a resource to be deleted from said resource list during said step of editing said list of resources (see col.16, lines 4-6).

Art Unit: 2132

As per claims 16, 27 and 37 Ahlberg et al (6,587,836 B1) teach a computer readable medium, a system and a method as recited in claims 1, 17 and 28, including the further step of deleting a profile from all users in said list of users for which a profile to be deleted from said profile list is specified during said step of editing said list of profiles (see col.16, lines 4-6).

As per claim 24 Ahlberg et al (6,587,836 B1) teach a system as recited in claim 23, wherein said means for directing is responsive to location or path data contained in said list of resources (see fig.7).

As per claim 25 Ahlberg et al (6,587,836 B1) teach a system as recited in claim 24, wherein said path or address data is a URL (see fig.4).

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2132

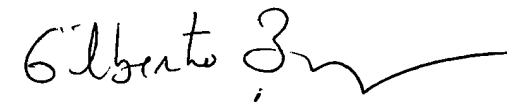

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
